Provides **peace of mind** on one of the largest investments of your life. No more worrying about expensive repairs on your home's appliances and mechanical systems.* One toll-free number is all you need.

Affords you **budget protection** after buying a home. You pay one low service fee per repair, and Home Warranty pays the rest (up to the contract's limits).

Fills the "wear and tear" gap created by possible exclusions to your homeowners' insurance coverage (subject to the provisions of the warranty). Your homeowners insurance coverage protects you in the event of a loss due to fire, smoke, wind, hail, theft, and the like...but not system failures due to normal wear and tear.

Allows you the **choice of service providers** to complete the repair. A preferred servicer (if available) will perform the initial diagnostics.
